How to Upload & Verify Your Entrance Requirements, Including Immunizations

Entrance Requirements for New Students

All incoming students (new, transfer, and graduate, including students in Veterinary Medicine, School of Law, School of Nursing programs, and undergraduates transitioning to a graduate or professional program) are required to meet the [UC Immunization and TB Risk Screening](#) requirements.

Immunization (IZ) Holds

To register for your second term at UC Davis, you must meet the [University of California's immunization requirements](#). If you don't, an "IZ hold" will be placed on your account. This hold will stop you from enrolling in classes for your second term. This hold is cleared by becoming compliant with the requirements.

Please refer to [OASIS](#) to determine if you have a hold.

For example, if you start as a student in Fall 2024, the IZ hold will block your registration for Winter 2025 classes if you haven't met the immunization requirements by your registration time for Winter 2025.

Individual School/Program Requirements

Individual schools or programs may have additional requirements. Program specific requirements can be found in the program's student handbook or syllabus. For submission of program specific requirements, refer to your program. Example: [Veterinary Medicine Student Requirement](#)

COVID-19 and Influenza (Flu) Immunization Requirements

Neither the COVID-19 nor the flu vaccine are considered entrance requirements, and they are NOT associated with your IZ hold.

The University of California requires all students, faculty, and staff who live, learn, or work on campus to stay up-to-date with their COVID-19 vaccinations. If you prefer not to receive the vaccine, you can opt out by submitting a declination form. To comply with the policy, students must either upload and enter the dates of your COVID-19 vaccination information or submit the declination form through [Health-e-Messaging](#). Please note that the COVID-19 vaccination requirement does not affect your ability to register for classes.

Each year, the University announces a seasonal flu vaccine mandate, typically in October. This mandate also does not affect your registration status. The deadline to enter this year's date of vaccination and upload proof of your flu vaccination or submit a declination form via [Health-e-Messaging](#) is generally around November 1st. For the most current information on flu vaccine requirements, please visit [Campus Ready](#).

Uploading and Entering Entrance Immunization Records

To enter your vaccination information, follow these steps:

1. Go to [Health-e-Messaging](#) click on “Requirements and Forms.” This section also includes forms and vaccines that are not considered Entrance Requirements. Your specific immunization requirements will be listed under “Items required for clearance.”

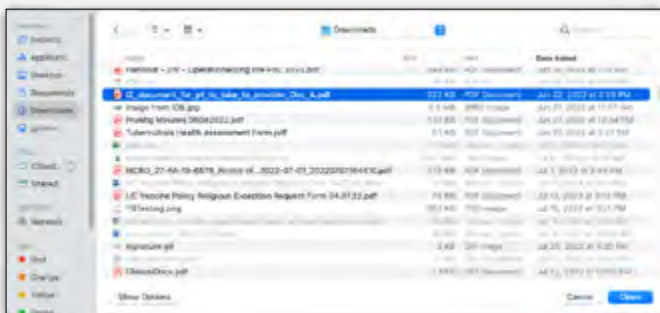

2. Enter your Vaccination Dates. For each requirement you need to:
 - a. Enter the dates of your vaccinations or blood tests

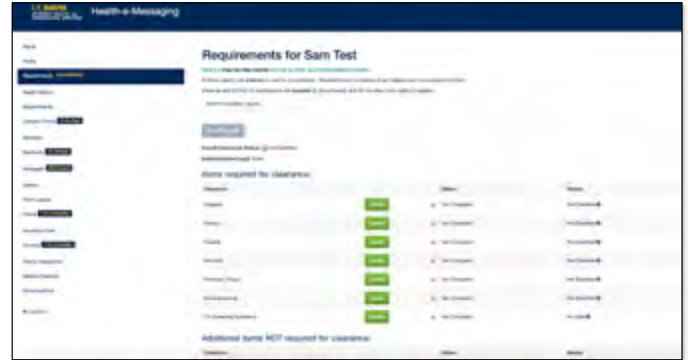

Note: You only need either a vaccination or a blood test, not both, to meet requirements.

- b. Upload proof of your immunization or blood test results. You can use a PDF, photo, or document.

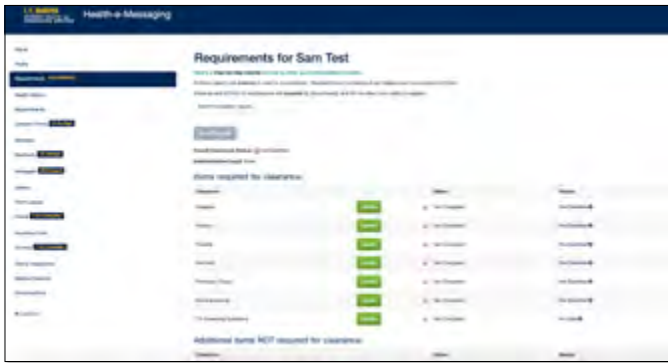

3. Upload Documents. Click the white “Add immunization record...” button at the top of the page to upload your proof of immunization or titer blood test results. You can also upload these documents as you are updating each requirement.

4. Update your Records. Click the green “Update” button next to the requirement you want to enter. Follow the instruction on the pop-up to add your vaccination history or blood test results.

TB Screening, TB Testing, and TB Health Assessment Form (or TB Screening Form) requirements

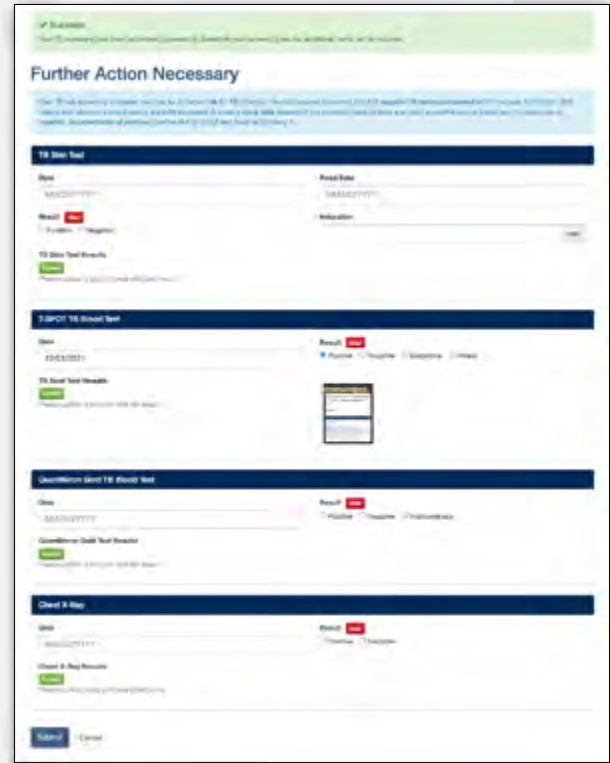

All incoming students must complete a Tuberculosis (TB) screening questionnaire.

To access the survey, click on the “Update” button next to “TB Screening.”

This will open the questionnaire. Your answers will influence if you need to provide further documentation. Please answer all questions and click on the “Submit” button.

If you make a mistake on your TB screening form, please message our TB/Immunization nurses through [Health-e-Messaging](#). You may need to refresh the webpage to see the requirement change to “Compliant.”

If additional documentation is required, a pop-up window titled “Further Action Necessary” will appear. If you close this window, you will see the new requirements under “Items required for clearance.”

Additional documentation required might include proof of a negative TB test completed within 12 months prior to the start of your first term and/or a TB Health Assessment Form (soon to be replaced with a TB Screening Form).

To meet the TB testing requirement, you can choose either a laboratory blood test or a skin test.

Overall Clearance Status: Not Satisfied

Clearance	Status	Details
COVID-19 Vaccine	Not Compliant	Not Satisfied
Influenza Immunization	Compliant	Satisfied
MMRs	Compliant	Satisfied
Meningococcal	Compliant	Satisfied
Shingles	Compliant	Satisfied
Tetanus (Tdap)	Compliant	Satisfied
Tuberculosis	Compliant	Satisfied
TB Screening	Compliant	Satisfied
TB Testing	Not Compliant	Not Satisfied
Vaccines	Compliant	Satisfied

A chest x-ray without a previously positive test does not meet the TB testing requirement. If you have ever had a positive skin or blood test, you will also need to submit a chest x-ray. Once you have your test results, enter your test dates and upload a copy of your records under “Requirements and Forms.” Be sure to select your results and enter the date in the month/day/year format. If you need to upload your documents at a later date, you can do so by clicking the green “Update” button.

TB Skin Test

Date: Read Date:

Result: New
 Positive Negative

Induration:

TB Skin Test Results

 Please upload a copy of your blood test result.

Chest X-Ray

Date: Result: New
 Positive Negative

Chest X-Ray Results
Upload
 Please upload a copy of your chest x-ray.

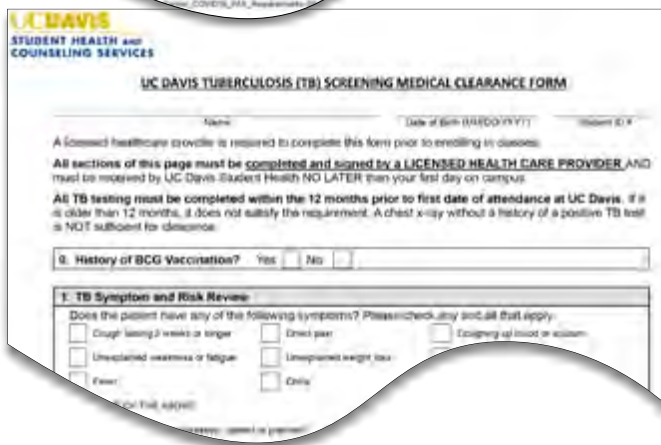

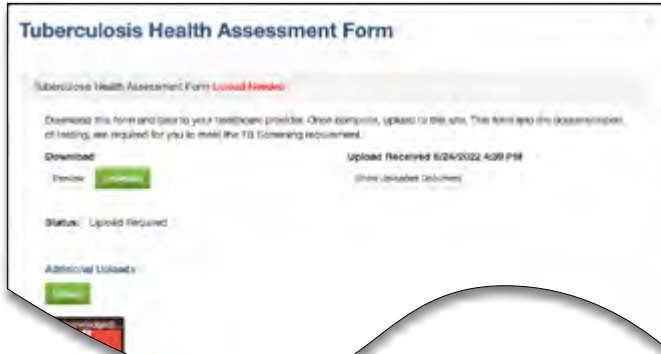

TB Screening Questions

TB Testing: Submit Done Not Started

TB Screening Questions

TB Health Assessment Form: Submit Done Not Started

If a TB Health Assessment Form (or TB Screening Form) is required, it must be completed by your healthcare provider. Once any required testing is complete and your provider has determined you are free of active TB, the provider must fill out and sign the form. Chest x-rays submitted with your TB Health Assessment Form must have been taken within the 12 months before the start of your first term.

Please note:

The TB Health Assessment Form must be completed in English, signed and dated by a licensed healthcare provider (DO, MD, NP, PA), and include your name, date of birth and/or student ID number. Forms that are incomplete or written in a language other than English will not be accepted and your "IZ" hold will NOT be cleared.

Please allow 14-21 business days for your documentation to be processed.
